Professional Summary

Undergraduate at IIIT Nagpur with hands-on experience in Python, SQL, Excel, Power BI, Tableau, Streamlit, and Machine Learning. Proven ability to process 50,000+ records, build predictive models with 84%+ accuracy, and deliver actionable insights that drive data-driven decision making. Seeking a Data Analyst or Data Science role to apply analytical and problem-solving skills to real-world business problems.

Education

Indian Institute of Information Technology, Nagpur

Bachelor of Technology in Electronics and Communication Engineering

Nagpur, Maharashtra

August 2023 – Present

Technical Skills

Programming Languages: Python, C, C++, HTML, CSS, JavaScript

Data Analytics: SQL, Excel, Advanced Excel, Power BI, Tableau, EDA, Data Visualization, Statistical Analysis

Libraries & Tools: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Streamlit, Scikit-learn, Prophet, GridSearchCV

AI Tools: ChatGPT, GitHub Copilot, Google Gemini API, AI-Powered Analytics Tools

Platforms: Git, GitHub, Google Colab, Jupyter Notebook, VS Code

Experience

AI Data Analytics Intern

InAmigos Foundation (NGO) — Remote

June 2026 – July 2026

- Structured a database of 18+ volunteer opportunities across India in Excel, streamlining access for 500+ students.
- Generated an AI-powered analysis report on 31,000+ NGOs across India, surfacing 5 actionable growth strategies.
- Completed 4 data projects within a 2-week deadline — NGO research database, volunteer tracker, AI insights report, and growth strategy analysis.
- Accelerated data collection using AI research tools, reducing manual research time by approximately 60% across all 4 deliverables.

Projects

DataPilot – AI Analytics Platform Python, Streamlit, Pandas, Plotly, Gemini API

[GitHub](#)

- Built a full-stack AI-powered analytics platform using Streamlit, enabling users to upload CSV/Excel datasets and instantly generate EDA, dashboards, and visualizations.
- Integrated the Google Gemini API to deliver AI-driven business insights, SQL query generation, Pandas code suggestions, and data-cleaning recommendations.
- Developed 7+ interactive chart types using Plotly, including heatmaps, scatter plots, and bar charts, with real-time filtering.
- Implemented an automated report generator exporting professional PDF, CSV, and Excel reports, reducing manual reporting time by approximately 70%.

E-Commerce Sales, Customer & Delivery Performance Analytics Power BI, Power Query, DAX

[GitHub](#)

- Built an end-to-end Power BI business intelligence solution on the Olist Brazilian E-Commerce dataset (99K+ orders, 96K+ unique customers) with a four-page interactive dashboard.
- Designed a relational data model connecting Orders, Payments, Reviews, Products, Sellers, and Customers, and authored 8+ DAX measures including On-Time Delivery %, AOV, and Average Delivery Variance.
- Used Power Query to clean and transform 8 raw datasets, building delivery-delay and delivery-status classifications from scratch.
- Surfaced key business metrics — \$13.59M total sales, 91.89% on-time delivery rate, and a 4.09 average review score — across four dashboard pages.

Customer Churn Prediction Python, Scikit-learn, Pandas, Matplotlib

[GitHub](#)

- Implemented Logistic Regression and Random Forest models on 7,000+ telecom customer records to predict churn with approximately 84% accuracy.
- Conducted EDA across 20+ features, surfacing contract type and customer tenure as the top 2 churn drivers using correlation heatmaps.
- Tuned models via GridSearchCV across 50+ hyperparameter combinations, improving baseline accuracy by approximately 12%.
- Segmented 2,100+ at-risk, month-to-month customers — approximately 3x more likely to churn — enabling targeted retention strategies.

Certifications
